## AsaBackup Keygen For (LifeTime) Free Download For Windows

AsaBackup is a desktop tool designed to help you back up your private data and save it to a specified location with as little effort as possible. Not too complicated to handle. The application is wrapped in a simple and straightforward interface, where the intuitive wizard takes you through all necessary steps to back up your files, so there should be no accommodation issues for any type of users. AsaBackup lets you schedule backup tasks and copy the items as they are to the location of your choice, without compressing them into archives. During the backup process, a progress bar is shown to inform you about the completion status. In our tests we have noticed that the utility had a good speed and worked without any errors, but this depends on the number and size of the items. Main functionality New tasks can be created by specifying the title, starting date, type (daily, weekly, bi-weekly or monthly), and whether it's recurring or runs only once. From the same page you can allow the tool to overwrite any previously backed up files without confirmation. Manual backup is also possible, provided that you create a default schedule by selecting its starting date and hour from the left side of the main panel to simply apply the settings. If mistakes were made while creating a new task or if you change your mind, the utility enables you to edit its properties with ease. Successful tasks can be marked as completed. The backup progress is autosaved in case your computer is turned off, and resumed at the next application launch. Last few words Taking everything into account, AsaBackup proves to be a reliable tool that lets you back up your private files and folders, schedule automatic backups, and repeat the tasks with little effort.
